

PATRICK GIANGROSSO JOINS COOLCENTRIC EXECUTIVE MANAGEMENT TEAM AS GENERAL MANAGER

PELHAM, NH (USA), — April 16, 2013 — Coolcentric, a division of Wakefield-Vette announces Patrick Giangrosso has joined the executive management team as Coolcentric General Manager, responsible for worldwide sales and marketing of Coolcentric products.

Following graduation from the University of Alabama with a BS/EE, and MBA from Golden Gate University School of Business, Giangrosso has worked for a number of major power and energy management and control companies. Working at Liebert, General Electric, United Technologies Corporation and most recently Eaton Corporation, Giangrosso has acquired years of invaluable experience. As project engineer, sales executive, director of global accounts and general manager, Giangrosso has collaborated with industry leaders like Google, Digital Realty Trust, IBM and Fujitsu to help them more effectively and efficiently manage energy consumption, contribute to a more sustainable environment, and reduce costs.

Giangrosso's global market knowledge and ability to forge strategic relationships with major suppliers of IT equipment and infrastructure products will prove a major asset as Coolcentric continues worldwide expansion and market penetration. As General Manager, Giangrosso will be charged with growing Coolcentric's customer portfolio of over 250 major installations such as Princeton University, Penn State University, Stamford University, Purdue University, RPI, UNC, NASA, Dept. of Homeland Defense, LBNL, Raytheon, Pfizer, Ford Motors, Exxon Mobile, Weather Bureau of China, Dept. of Finance in Taiwan, King Saud University - Saudi Arabia, to name just a few.

About Coolcentric:

Coolcentric[®] delivers the world's most energy and space efficient cooling solutions for reducing costs and data center sustainability. Coolcentric products for rack level cooling, combined with services for integration and deployment of Coolcentric data center thermal solutions, allow customers to optimize their data centers for maximum performance and return on investment.
